

Dr. Huub Schepers

Dr Huub Schepers studied crop protection at Wageningen University in The Netherlands. He did his PhD degree at the Phytopathology department of Wageningen University on the topic of fungicide resistance in powdery mildew in cucumbers. He worked in the Extension Service of the Ministry of Agriculture, in the R&D department of Hoechst Holland and with the Ministry of Social Affairs (safe pesticide use) and since 1991 as a plant pathologist in the institute for Applied Plant Research which is a part of Wageningen University in The Netherlands. Developing integrated control strategies for potato late blight is one of his most important topics. He is one of the coordinators of the European network EuroBlight in which representatives of research institutes and agrochemical companies of more than 20 European countries meet and exchange information on late blight.
